

Task 10

CRUD operations in Document Database

AIM:

To perform create, read, update and Delete (CRUD) operations in a document-oriented database

Steps and commands:

1. Create a collection

```
db.createCollection("Hotel Bookings");
```

Output:

```
{ "ok": 1 }
```

2. Insert one document

```
db.HotelBooking.insertOne({
  Booking-ID: "B001",
  Guest-Name: "John",
  Room-No: 101,
  Room-Type: "Deluxe",
  CheckIn-Date: "2025-10-10",
  CheckOut-Date: "2025-10-14",
  Total-Amount: 8000
})
```

Output:

Document inserted successfully

3. Insert many documents

```
db.HotelBookings.insertMany([
  { Booking-ID: "B002", Guest-Name: "Maria", Room-No: 102,
    Room-Type: "Suite", CheckIn-Date: "2025-10-12", CheckOut-Date: "2025-10-15",
    Total-Amount: 12000 },
  ...
])
```

```
{ Booking-ID: "B003", Guest-Name: "Vijay", Room No: 103,  
Room-Type: "standard", Check-In-Date: "2025-10-13", Check-Out-Date: "2025-10-16",  
Total-Amount: 6000 }
```

});

Output:

multiple documents inserted successfully

4. Read documents

```
db.HotelBookings.find().pretty();
```

Output:

Displays all hotel booking records in a readable format

5. Query specific data

```
db.HotelBookings.find({ Room-Type: "Suite", Guest-Name: "I",  
Room-No: 1, -id: 0 });
```

Output:

Displays Guest names and room numbers for suite rooms

6. Update a Document

```
db.HotelBookings.updateOne(  
  { Booking-ID: "B001" },  
  { $set: { Total-Amount: 8500 } }  
);
```

Output:

Updated one document successfully.

7. Delete a document

db HotelBookings.delete one ({Booking_id: "B003"});

Output:

Deleted one document successfully
